**Address:** Beijing Economic and Technological Development Zone, Haiwu str., 58

## FAQ

### Why, after a successful connection of outer network cable and the completion of all the settings to the network access, error occurs?

Make sure you have correctly connected the network cable, and verify your username and password; We recommend a visit to any web page via the mobile app or web browser by using the smart error detection, locate and solve a problem. It may take a few minutes.

### Error 678: ISP server does not allow re-entry into the system with the same account.

Remedy: once remove, and then reinsert the cable of outer network, reset the fiber / home gateway / adsl modem, after 10 minutes, try to connect again.

### Error 691: ISP server generates an error: login and password or the account has expired.

Remedy: check your user name and password. You can also enter your login and password on the operator's website to check the details of payment

services.

## The presence of toxic and harmful substances

### Is possible determinate Wifi network name (SSID) on local language? Why sometimes name of Wifi network is distorted?

Mi router supports Wifi network name in local languages, but for normal display, you need to connect to the router by device (smartphone / pad / computer) that also support local language SSID.

### IP-address and web app password?

IP-address of Mi router website is miwifi.com or 192.168.31.1. Password of utility is the same, as Wifi password, which was set during device initialization.

### Why after switching of the router red light lights up?

A flashing red LED indicates a system error or a problem with the operation of the device, as well as evidence of entering the safe mode. During safe mode, all data stored on the router, are protected.

You can restore the normal operation of the device with a network cable or computer software, or to contact a technical service call to resolve the issue.

A steady red light indicates a malfunction of the system start-up or a problem with the entrance into safe mode.

Name	Toxic and hazardous substances and elements					
	P	Hg	Cd	Cr <sup>6+</sup>	PBB	PBDE
Case	0	0	0	0	0	0
Circuit board	X	0	0	0	0	0
Power adapter	X	0	0	0	0	0
Additional components	0	0	0	0	0	0

**O:** toxic and harmful substances in all components of the device are contained in an amount below the limit value according to SJ / T11363-2006 "Requirements limiting the presence of toxic and hazardous substances in products."
