Light and turning switch

1. Powered on. When you hear «Di», machine is on standby
status.
2. Light switch: press once: ambient orange light will be on,
press again to turn off the bottom light.
3. Turning button: clockwise turning: machine starts to work
and UV light is on. Anti clockwise turning is to switch off the
machine and turn off the UV light.
4. Water lack protection: when water tank is empty, you will
hear «dididi», bottom light will be red. Please, add water,
turn the button to off status and turn on again according to
step 3.

How to use

Humidifier functions:

1. Add water to tank to higher indication level, but don’t
exceed.
2. Put the tank into the base.
3. When water level indicator arrow matches the arrow on
front of the base, put on the top cover.
4. Plug and it begins to humidify.
Aromatherapy

1. Take out the oil essence box and add a few drops of oil essence.
2. Put the box into the base.
Note: Water can’t exceed the highest level mark, otherwise, the wind exit will be flooded.

Fog leading tube cleaning

1. Use both hands to push the tube upward until you hear a click sound.
2. Take the tube out and clean.
Note: Cleaning water higher than 50 degrees centigrade will cause dis-shape of the water tank and fog leading tube.

Note

1. Adding a water: after the top cover is removed, you can add water from the cup, or take out the water tank to tap to add water.
2. Base water: the humidifier uses the ultrasonic foggy flap to change water to fog, water tank is media only. It’s normal to humidifier to accumulate water in the base.
3. Foggy adjustment: if air humidity is high, there will be water around humidifier, please adjust fog to low level.

Fault and remove

1. Light is off, No wind and fog.
   Analysis: Didn’t plug to socket or defective.
   Solution: Connect to socket. If still don’t work, connect Deerma.

2. Light is on, but no wind or fog.
   Analysis: Water level is too high.
   Solution: Pour out some water, and make the arrow of the water level indicator meet arrow on the base.

3. Fog is little.
   Analysis: Foggy flat or water is dirty.
   Solution: Clean the foggy flat, change water to clear.

4. Noise sound.
   Analysis: Water is less, desk is not flat.
   Solution: Add a clear water, put the humidifier on strong flat surface.

5. Water can’t reach the bottom base.
   Analysis: Water tank cover is dirty, or water tank is not properly placed.
   Solution: Clean the water tank cover and operate correctly.
