

## Aqara (Zigbee) Light control

### Overview

Wall switch (ZigBee two-key switch) is a wireless light switch. Installing this unit is very easy and fast. You do not have to change an existing equipment and wires routes. You need only replace traditional wall switch. Connect your device to Mi multifunction gateway for remote control and other Smart devices. In the event of an overload or excess temperature, the device is automatically disconnected from a power supply.

\* Installation and adjustment of the device must be carried out by qualified personnel according to electrical regulations and guidelines set out in the manual of the device.

\* Before using, please turn off the main switch on the electric board. After installing the unit turn the main switch on the electric board, open Mi Smart Home APP and connect wall switch to Mi multifunction gateway (see section «Setup» and «Add new device»). You can not use the device with Smart Lamp and dual control scheme.

### Installing

Each key of wall switch is designed to control a one electric chain of lamps. Method of installation:

1. Turn off the main switch on switchgears, loosen the screws on the back of the device, insert a positive wire to connector L, and a lamp wire to sockets L1 and L2. (Note: lamp, connected to sockets L1 and L2, on / off by right and left keys), tighten the screws.

2. Use a screwdriver with a straight tip to open a top panel of switch.

3. Firmly attach the wall switch to terminal box using screws.

### Installing

4. Attach top panel of the wall switch.

5. Turn on the main switch on the electricity board. Fast blinking blue light indicates the normal power supply. If you press the button, start slowly blinking red, which indicates normal operation of the device and no network connection. Install an application, and then add a new device to the list of devices.

### Installing of Mi Smart Home APP

To install the client application on your smartphone, open Mi Store and search for «Mi Smart Home» APP or scan the QR-Code. You can connect with Mi-rich gateway. after which, according to instructions in section «Adding a new device,» adding wall switch (ZigBee switch) to the list of devices.

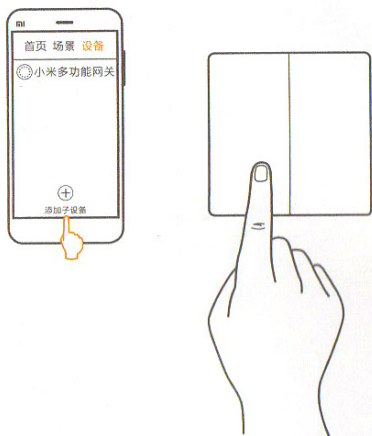

This device is already in the list of devices in «Mi Smart Home», supports MIUI system, and can be combined with other smart devices to your home.

More Smart devices you find in mobile app Mi «Smart Home» or after visiting site [mi.com](http://mi.com) and registering.

Mi windows / doors sensor + ZigBee switch

## Presence of toxic and hazardous substances

Name of a part	Pb	Hg	Cd	Cr6+	PBB	PBDE
White plastic body	O	O	O	O	O	O
Hard plastic	O	O	O	O	O	O
Metal parts	O	O	O	O	O	O
Resistor	O	O	O	O	O	O

O: toxic and harmful substances in all components of the device are contained in an amount below the limit value according to SJ / T11363-2006 «requirements limit of presence of toxic and hazardous substances in products.»

X: means that presence of toxic and hazardous substances at least one of the components of the device, in an amount, that exceeds a threshold, according to SJ / T11363-2006 «requirements limit of presence of toxic and hazardous substances in products.»

## Indicator

Indicator	Device status
Light blue flashed once	Enabling device
Slowly blinks red	The device is not connected to a network
Quickly blinks blue	The device is connected to a network
Continued blue light	The device is connected to a network and light is on
Quickly blinks red	Risk of overheating and / or overload of the device
